PAT.

Title

- 1 6,749,574 Ventricular catheter with reduced size connector
- 2 6,689,756 Treatment of neurological disease
- 3 6,620,356 Porous constructs fabricated by gas induced phase inversion
- 4 6,596,293 Polyurethane-biopolymer composite
- 5 6,453,185 Ventricular catheter with reduced size connector and method of use
- 6 6,359,102 Biphasic polymerization process
- 7 5,997,895 T Dural/meningeal repair product using collagen matrix
- 8 5,837,226 T Ocular microsphere delivery system
- 9 5,833,665 Polyurethane-biopolymer composite
- 10 5,629,191 Method of making a porous matrix particle
- 11 5,489,304 Method of skin regeneration using a collagen-glycosaminoglycan matrix and cultured epithelial autograft
